Skills	Android	• 5+ years of core Android native development experience • Proficient with Java and Android SDK • Hands on practice in Kotlin • Published 4 Android Apps on Play Store • Experience with offline storage, and multi-threading • RESTful APIs to connect Android apps with back-end services. • Strong Debugging skills • Strong OOPs concepts/design pattern knowledge • Experience in create complex and pixel perfect layouts.
---------------	----------------	--

- Experience with third-party libraries and APIs
 - Google APIs (Maps, Directions APIs, Geocoding), Social APIs, Volley, Retrofit, Picasso, OpenCV, Firebase.
- Cloud message APIs and push notifications.
- Database Sqlite and Room.

iOS

- 2+ years of core iOS native development experience
- Hands on practice in Swift
- Experience with offline storage, and multi-threading
- RESTful APIs to connect iOS apps with back-end services
- Strong Debugging skills
- Experience with third-party libraries and APIs
 - Google APIs (Maps, Directions APIs, Geocoding), Alamofire, Kingfisher, Firebase, Starscream, SwiftJSON
- Cloud message APIs and push notifications.
- Database Sqlite and Core Data

NodeJS

- Knowledge of Node.js and framework Express
- JavaScript front-end/back-end development experience
- Experience with Node.js utility libraries
- Experience in implementing npm modules
- Experience building REST based APIs
- Setup and configuration of Heroku environment

AI based Chatbots (DialogFlow)

- Experience in creating multilingual chatbots
- Using Google's DialogFlow as NLP tool
- Using NodeJS as backend programming language
- Experience in creating Telegram chatbots
- Experience in creating multilingual and highly customizable agents in DialogFlow

Git

- Experience in GIT version control system
- Creating multiple branches
- Experience in resolving code conflicts
- Experience in creating pull requests, performing code reviews and code merging

Android Apps on Play Store:

Project:
URL:

Alforat News

<https://play.google.com/store/apps/details?id=com.rgn.alforatnews>

Project:
URL:

eMaktab Parent App

<https://play.google.com/store/apps/details?id=com.emaktab.app>

Project: **Islamic Books Library**
URL: <https://play.google.com/store/apps/details?id=my.islamic.books.lib.app>

Project: **Houston Living Android App (Replica of iOS App)**
URL: <https://play.google.com/store/apps/details?id=com.har.houstonliving>

iOS Applications

Project: **jamesApp (Home Automation)**
URL: <http://www.genetechsolutions.com/portfolio/detail/home-automation.html>
