Experienced tech professional skilled in Android native apps (Java & Kotlin), NodeJS, Chatbots, and DialogFlow. Seeking the position of Senior Android Developer to leverage 10 years of experience in handling popular Android, NodeJS, and chatbot projects.

Senior Software Engineer

Genetech Solutions Inc, Karachi

Jan 2020 – Present (3 yrs 2 mos)

I joined Genetech Solutions in October 2012, marking the beginning of my professional career. My initial role at the company was that of a junior Android application developer. However, over time, I have gained extensive experience in the domains of Android, NodeJS, and chatbot development.

At present, I hold the position of Senior Software Engineer at the organization. During my tenure, my primary responsibilities have entailed the design, analysis, development, and maintenance of both new and existing Android and NodeJS-based applications, as well as chatbots.

In addition to these core responsibilities, I also communicate regularly with our diverse clientele, ensuring that their needs are met and their expectations exceeded.

Senior Software Developer | SME

Genetech Solutions Inc, Karachi

Nov 2018 – Dec 2019 (1 yr 2 mos)

Senior Android Application Developer

Genetech Solutions Inc, Karachi

Nov 2014 – Oct 2018 (4 yrs)

Jr Android Application Developer

Genetech Solutions Inc, Karachi

Oct 2012 – Oct 2014 (2 yrs 1 mo)

Projects

Android apps on Play Store:

Islamic Books Library

<https://play.google.com/store/apps/details?id=my.islamic.books.lib.app>

Houston Living Android App

<https://play.google.com/store/apps/details?id=com.har.houstonliving>

Alforat News

<https://play.google.com/store/apps/details?id=com.rgn.alforatnews>

eMaktab Parent App

<https://play.google.com/store/apps/details?id=com.emaktab.app>

qBot (Telegram bot):

qBot is an AI multilingual, NLP chatbot developed in NodeJS (as backend programming language), It has following features and can answer to following user queries very efficiently

- Q Tell me a joke
- Q set reminder for goto gym daily at 5 pm
- Q create task (Todoist integration)
- Q do you know distance from Earth to moon (Wolfram integration)
- Q show all movies list (yts APIs integration)
- Q play movie the Matrix in living room
- Q download new movie
- Q create incident
- Answers general small talks messages like greetings, about bot, emotions etc

JamesApp (iOS App):

The jamesApp was developed using Swift and functions as a remote control for the apartment (Home automation system). It allows for easy control of the lighting, music, and mood with just a button press, utilizing the Loxone mini-server. Additionally, the app enables users to communicate with James or reach out to a member of our team.

Whether you need to order laundry, transportation, in-room dining, or simply check the weather for your planned destination, jamesApp has got you covered. Moreover, the app features an Artificial Intelligent bot named qJamesBot, enhancing the overall user experience.
